SUBJ: Sampling Results for 602 Ruth Street

Exemption 6 Personal Privacy

Dear

On March 13, 2019, the United States Environmental Protection Agency (EPA) sampled soil in the front yard of 602 Ruth Street. The purpose of the sampling was to determine whether contamination was present from the spill that occurred on September 14, 2019, from the L&R Oil Recovery Facility.

The samples were analyzed for Polychlorinated Biphenyls (PCBs). Results indicate that there were no detection levels above EPA's Removal Maximum Levels (RMLs) and determine that no further response actions are necessary to protect public health and the environment. Laboratory data sheets are available upon request.

If you have questions or need further information, please feel free to contact Angela Miller, EPA Community Involvement Coordinator directly at (678) 575-8132 or via email miller.angela@epa.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Kevin Eichinger", is written over a horizontal line.
